

Hi! My name is Henrik, Iám 21 years old. I was born and raised here in Gothenburg. I grew up in a nice neighbourhood named Utby in the north-east of Gothenburg. Utby is a calm and peaceful place surrounded with some fine nature.

As a kid I played a lot in the woods with my friends, climbing trees and made weapons like bow and wooden swords. I still like the forest, Iám definitely not into night life in the city. I like to walk in the forest, it is very peaceful. Of course I like to spend time with my friends but I prefer to have a private party rather than going out. Maybe it is because I don't like meeting new people. I rather have few good friends who I know really well than knowing a lot of different people.

I really like my computer, working with graphics and web design is very funny. I bought my computer early like my friends, but they were more interested in games and programming. My very first application wasn't the nasty first person shooter Doom 2, it was the great graphic program Photoshop 2.5.1.

My previous time in school wasn't that successful, I didn't have the motivation. But I really do now. CSN only gives you money for three years when you study on "gymnasie nivå" when you are 20 years old. Because of that I feel that I must take really good care of these years that I have in front of me. I know that I must make it this time to get my "gymnasie kompetens" after that Iám thinking of studying media or some kind of graphic program at Komvux.

I live by myself now and I really think a lot about the future now. When I lived at home I didn't care that much about the future but I really do now. This summer I finally got my driving license which I have struggled with the last three years. That was a big boost to my selfconfidence.

It feels good to live by myself, I like to be my own boss, to take care of myself. And I really enjoy school like never before. When I was younger it was a pain to go to school.

Music is something that makes me feel good. I like all different kinds but most rock music like Ozzy and Kizz. The great thing about songs is that when I listen to them they remind me of things in the past. They bring old memories alive and it almost feels like Iám there in eighth grade when I heard Cracy train for the first time and Anna danced on the table.

Memories are very important to me and I think a lot about the past. And I really like when my grandmother showed me old photos of the family. And I hope that my life will be good too.
